

## Copper Enamel Stripping Machine

### Let`s See About The Machine

A copper enamel stripping machine is a device designed for the specific purpose of removing the enamel coating from copper wires. The enamel is an insulating layer often found on copper wires, and removing it may be necessary for various reasons, such as recycling or preparing the wire for further processing.

### Let`s See Who We Are?

We take pride in being at the forefront of innovation and excellence in the field of machine manufacturing. With a rich legacy of 10 years, we have established ourselves as a trusted industry leader dedicated to delivering Copper wires solutions to our valued clients.

We understand that each client is unique, and their requirements vary. That's why we adopt a client-centric approach, working closely with our partners to tailor our machines to suit their specific needs.

### Technical Specifications

- Model : NMT-WSCY-0206
- Wire Size Range : 0.2 to 0.5 mm (Swg 36 to 25)
- Strip Method : Cylindrical Fiber Glass Wheels
- Strip Length : No restriction on strip length
- Wheel distance adjustment : By knurled thumb screw
- Operating Voltage : 220VAC Single Phase
- Consumable Item : Fiber Glass Wheels
- Operation : Semi Automatic (operator required to operate the machine)
- Warranty : 6 Months
- Foot Padel / Push Button Operated

### Unlocking Value: The Customer-Centric Advantage

- Efficient Enamel Removal
- Reduced Scrap
- Cost Savings
- Enhanced Productivity
- Consistent Results
- Versatility
- User-Friendly Operation
